

# Point-recipe trade-off (secondary): different job than operating regions

**A**

vs longer BO (qLogNEI R10)

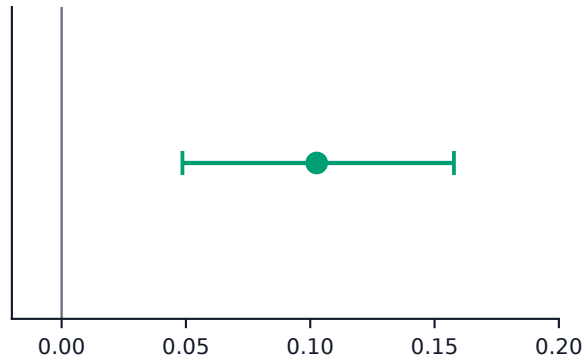

-0.0005 [-0.0221, +0.0207] · n=160 · p=0.95

*No detectable gap at half the rounds  
(not claimed as equivalence)*

**B**

vs screened DoE (R3)

+0.1026 [+0.0486, +0.1578] · n=160 · p<0.0001

*DoE wins the single-recipe job  
(expected when that is the goal)*
